

SURESTART Preventive Maintenance Services

Switchgear

Level 12

Level 12: Switchgear Visual Inspection and Testing

- Verify enclosure is level, anchored properly, and free of moisture and debris
- Inspect for signs of flash-over or tracing
- Verify system one line and "G" drawings
- Download and log; alarms, system settings, utility settings, generator settings, and load shed settings
- Visually inspect wiring connections for tracking, overheating, insulation, deterioration, arcing, and corona
- *Recommended every 6 months*

SURESTART Service is a Quinn preventive maintenance and inspection program, custom designed to help reduce power system operating costs, prolong component life, and increase the overall reliability of your equipment.
