

SURESTART Preventive Maintenance Services

Switchgear

Level 13

Level 13: Switchgear Inspection, Testing, and Maintenance

- Thoroughly inspect enclosure for rust, corrosion, and debris
- Inspect bus connections, splice bolts, and mounting isolator bolts
- Verify torque on bus connections, splice bolts, mounting isolator bolts, CT's, PT's, VT's, and control wires
- Verify metering accuracy of system, generator, utility, tie, and distribution
- Inspect ground connections of station batteries
- *Recommended every 12 months*

SURESTART Service is a Quinn preventive maintenance and inspection program, custom designed to help reduce power system operating costs, prolong component life, and increase the overall reliability of your equipment.
