

SURESTART Preventive Maintenance Services

UPS Systems

PM Level 25

Level 25: Semi-Annual Battery UPS Inspection

- Complete visual inspection of equipment including subassemblies, wiring harnesses, cables, and related major components
- Perform a temperature scan on all breakers, power connections, fuses and associated controls
- Check module(s) completely for the following (if applicable)
 - * Rectifier and inverter snubber boards for discoloration
 - * Power capacitors for swelling or leaking of oil
 - * DC capacitor vent caps
- Inspect general condition of battery plant
- Review system performance to address any questions and schedule any remedial repairs
- Recommended every 6 months

SURESTART Service is a Quinn preventive maintenance and inspection program, custom designed to help reduce power system operating costs, prolong component life, and increase the overall reliability of your equipment.
